

# Flagstone Mats Slate

Flagstone mats introduces a new concept in stone flooring. Selected stones of slate and quartz are adhered to a rubber mat to form panels measuring approximately three square feet each. The panel colors and finish make it a fit for any environment, interior or exterior. The stones can be sealed or left natural based on their use. These modular mats make the installation faster and more efficient than the traditional method of placing individual pieces, reducing cost and labor time.

## ■ Irregular Flagstone Mat-specifications

• Average Dimensions (inches):	30*21
• Average Square Feet Per Mat	3
• Average Weight Per Mat(lbs.)	24
• Approximate Stone Thickness(inches)	0.5
• Gap Between Stones(inches)	0.35-0.6
• Plastic Mat Thickness(inches)	0.06-0.08
• Approx Plastic Mat Gaps(inches)	0.2
• Pieces Per Crate	64

■ Output: 10-15 containers each month
